LEARN TODAY SHAPE TOMORROW

Choosing a University is about much more than selecting a degree — it's about deciding the path you want to take for the future. At JUNIA, we believe that the future is not something we simply endure: it is something we build through action, with boldness, rigor, and responsibility.

Our era is marked by major transitions — environmental, digital, and energy-related — that challenge our reference points and present both challenges and opportunities to invent sustainable, useful solutions for all. These changes drive JUNIA's mission: to train engineers who not only understand these shifts but also provide concrete solutions.

For 140 years, JUNIA has reinvented itself with each generation. Rooted in history, connected to businesses and regions, and open to the world, our school stands today as a place where talents awaken, grow, and find their place. Here, every student learns to combine scientific rigor with creativity, critical thinking with a sense of action, and technological innovation with human responsibility.

JUNIA is also a supportive community. A demanding yet caring school, where every journey matters. Our campuses, laboratories, international partnerships, and network of 35,000 alumni are all resources dedicated to one goal: enabling each individual to develop their potential and succeed.

The engineers of tomorrow will not just be technical experts. They will be committed leaders, capable of transforming reality, imagining new ways to produce, nourish, live, and communicate. This is the ambition we uphold: to give our students the means to invent a fairer, more sustainable, and more humane world.

Joining JUNIA means choosing a school that prepares you to meet tomorrow's challenges and to start building, today, the future we want to create together.

ALEXANDRE RIGAL

CEO of JUNIA

ANTICIPATE, INNOVATE, ACT FOR TOMORROW

Visionary and true to its history and values, JUNIA is committed to being at the heart of major transitions. It draws from its heritage and scientific expertise to anticipate issues, stimulate innovation, and accelerate transformations. Here, every talent finds the means to learn, invent, and act to build the world of tomorrow.

A HISTORY THAT INSPIRES THE FUTURE

JUNIA's history began in 1885, within the Catholic University of Lille, with the foundation of HEI school of engineering. The foundation of ISEN school of electronics in 1956 and ISA school of life science in 1963 completed the ambition of the university: **to train engineers able to accompany the industrial, technological, agricultural, and environmental evolutions of their time.**

Each in its own way, these schools paved the way: by prioritizing practice and proximity to companies, by anticipating digital revolutions, and by supporting the changes in agriculture and the agri-food sector. They forged a solid foundation, blending scientific rigor, openness to the world, and a sense of commitment.

Today, this heritage is united under a single name: JUNIA.

A unique school, which builds on over a century of experience to prepare the engineers of tomorrow. Faithful to its values of high standards, boldness, and benevolence, JUNIA fully embraces its role: to give each generation the means to innovate, act, and contribute to a sustainable future.

OUR VALUES, YOUR STRENGTH

Excellence & High Standards

At JUNIA, high standards go beyond academic knowledge. They are also expressed through personalized support that encourages every student to give their best, in a stimulating and human environment.

Benevolence & Support

Because an engineer also grows thanks to others, **JUNIA places benevolence at the heart of its educational project.** Our campuses are places of mutual aid and diversity, where every talent finds its place and grows with confidence.

Innovation & Boldness

We encourage our students **to dare, experiment, undertake, and create.** Boldness means transforming an idea into a concrete project and making innovation a useful response to tomorrow's challenges.

**Choose
your path,
invent
tomorrow**

At JUNIA, you don't just train for a job: you choose from four complementary programmes (HEI, ISA, ISEN, and XP), in contact with companies, territories, and the world. You develop a solid scientific expertise, as well as your creativity, to become a well-rounded engineer, ready to shape the world of tomorrow.

A SCHOOL IN MOTION SINCE 1885

A SCHOOL RECOGNIZED FOR PUBLIC INTEREST

JUNIA is an engineering school, a non-profit association (Law of 1901), and recognized by the State as being of general interest (EESPIG label). This non-profit status guarantees that all resources directly serve education and research, in a spirit of demanding academic quality.

As a member of the Catholic University of Lille, JUNIA relies on the strength of a large university collective while affirming its core project: **training engineers capable of driving transitions.**

Faithful to its DNA, the school remains guided by the principles that marked its creation:

- **Offer adapted education, rooted in local areas** and open to human, social, international, environmental, and ethical dimensions
- **Train engineers** with both a solid scientific background and a well-developed practical sense
- **Develop excellent research**, serving education and society

Spread across **three campuses** —Lille, Châteauroux, and Bordeaux— JUNIA welcomes over **4,000 students**, including **700 apprentices** and **25% international students**. The diversity of profiles and the richness of the associative, cultural, sports, and civic life create a stimulating and caring environment where everyone can thrive.

THE SCHOOL OF TRANSITIONS

Building on a multidisciplinary foundation of skills, JUNIA prepares its engineers to meet the great challenges of the 21st century.

Environmental, energy, digital, and societal transitions: these are all changes affecting our ways of life, businesses, and local areas, and our graduates are trained to respond to them effectively and creatively.

PROGRAMMES ROOTED IN REALITY

Each JUNIA degree covers a field directly related to the ongoing transitions:

- **The JUNIA HEI Programme Sustainable energy, industries, and buildings:** supporting the transformation of industrial models, the mutation of infrastructures, and the emergence of more energy-efficient solutions. Civil engineering, robotics, materials, smart buildings, responsible industry: these are all areas for inventing new solutions.
- **The JUNIA ISA Programme Agriculture, food, and environment:** rethinking our connection to life, developing sustainable agricultural practices, ensuring food security, managing resources, and preserving ecosystems. An education focused on ecological transition and food sovereignty.

- **The JUNIA ISEN Programme Digital technology, electronics, and smart systems:** training those who design, control, and secure digital technologies. IT, electronics, data, AI, cybersecurity, smart networks: constantly evolving professions where innovation and digital sovereignty are at the heart of tomorrow's challenges.

- **The JUNIA XP programmes Professional transitions and new professions:** supporting non-linear career paths and career evolution. Offering training accessible throughout life, including full-time, work-study, or continuing education, to prepare talents for the emerging needs of companies and local areas.

Thanks to this comprehensive and transversal offer, JUNIA trains engineers capable of combining knowledge, working on projects, and innovating in direct connection with companies, research laboratories, and local areas. Open to the world, the school welcomes 20% of students from all over the world each year and offers many mobility opportunities.

Humanities at the Heart of JUNIA's

Social science courses have always been part of JUNIA's pedagogical philosophy. This heritage is reflected in a human and humanist education found in all programmes, aiming to equip students with the means to develop shared values, critical consciousness, and sensitivity to societal issues.

TALENTS RECOGNIZED WORLDWIDE

**Student and staff mobility, welcoming students from all over the world, international partnerships, and double degrees...
For many years, the international dimension has not only been at the heart of JUNIA's DNA but also a major axis of its development.**

A SCHOOL WITH AN INTERNATIONAL REACH

JUNIA has chosen to give a significant place to the international dimension. Over the years, JUNIA has forged partnerships with more than 340 universities around the world.

With its renowned partners, JUNIA establishes collaborations in the fields of research and pedagogy, co-develops joint and double-degree programmes, European and international projects, and more.

To guarantee the visibility of its activities internationally, JUNIA is also active with official bodies abroad (Campus France Network, Embassies) and thematic international networks.

JUNIA also multiplies partnerships with companies to help economic actors recruit and train the international talents they need. Finally, JUNIA's international influence is also channeled through its Alumni who are ambassadors of

the school in the professional world.

JUNIA also offers a multicultural experience on a daily basis. This includes programmes entirely taught in English, study trips in

Europe, welcoming international professors, and the development of academic partnerships such as international Master's degrees and double degrees.

A holder of the Erasmus Charter, JUNIA commits to respecting the fundamental principles and values of European programmes: equal opportunities, openness to others, and humanism. Within the framework of Erasmus+, JUNIA is involved in programmes dedicated to student mobility (for studies or internships) and staff mobility (for teaching and training), in strategic partnerships, International Credit Mobility projects, and in welcoming professors and professionals from other institutions worldwide.

JUNIA has also been awarded the 3-star "Bienvenue en France" label. This label recognizes the quality of the welcome and support provided to international students at our school.

A SCHOOL WITHOUT BORDERS

Coming from Mexico to Lille to study at

JUNIA has been an important step in my academic journey. The welcome services helped me with the main administrative procedures, which made my arrival in France easier. The courses are structured and focused on both theory and practical applications, allowing me to build skills relevant to my field. Studying in an international environment has given me the opportunity to work with students from different backgrounds. Outside the university, Lille is a student city with many different activities to do. Overall, my experience at JUNIA and in Lille has been great from a personal and academic perspective.

Maria José AGRAZ RENTERIA

A MULTICULTURAL SCHOOL

Each year, JUNIA welcomes international students. They represent, on average, 25% of students on campus. With its partners worldwide, JUNIA has co-designed “bridge programmes” to allow them to acquire the necessary prerequisites in their home country to continue their studies in France at graduate level.

JUNIA offers all its international students a welcome programme to facilitate their arrival in France and their integration into the school.

This orientation session includes intensive French language courses, intercultural communication, individual guidance support, as well as logistical and administrative assistance before and during their stay in France (assistance with accommodation, VISA, insurance, etc.). International mobility also concerns all staff.

Each year, JUNIA welcomes about a hundred visiting international professors and sends just as many abroad. JUNIA’s student and staff mobility policy thus promotes high-value multicultural exchanges on campus.

OUR CAMPUS

JUNIA is the School of Science and Technology of Lille Catholic University, France's largest private not-for-profit university.

Founded in 1875, the Lille Catholic University is a multidisciplinary institution that brings together 5 Faculties, 17 Schools of business and engineering, and health and social care colleges.

LILLE, A VIBRANT CITY AT THE HEART OF EUROPE

With a rich and complex history shaped by various European influences, Lille has grown into a vibrant, modern city known for its creativity, innovation, and quality of life. Today, it is part of a dynamic crossborder metropolitan area of over 2 million people, yet it retains a welcoming, human-scale atmosphere with under 250,000 residents - nearly half of whom are under 30.

Lille is a true student city, easily explored on foot or by bike, and supported by an efficient public transport system including metro, trams, and frequent trains that connect it seamlessly to Paris, Brussels, London, and many other national and European destinations.

STUDENT LIFE AND CAMPUS SERVICES

With a multitude of associations, every student has the opportunity to get involved and contribute to the university community.

Located in the city center of Lille, our campus offers a wide range of services :

- student facilities: restaurants, residence halls, sports complex, health center,
- environmentally friendly campus surrounded by parks and green spaces,
- a dynamic student life with numerous student associations on campus (music, sports, theatre, gastronomy...).

42,000
students including
8,800+ international

354
degree programmes

**A hospital group
and colleges of health
and social care**
(total of nearly 2,000 beds)

THE SCHOOL FOR BUSINESSES AND STUDENTS

In an ever-changing world, learning is a lifelong process. Based on this observation, JUNIA positions itself at the interface between businesses and education to support its students, as well as companies, in the development and acquisition of skills.

PROJECTS SERVING BUSINESSES

Companies can rely on the skills of students and teacher-researchers to carry out their projects: audits, trend studies, technology watch, innovation, etc. They also benefit from access to the school's equipment (laboratories, agri-food platform, etc.) with personalized support for their use.

A PRIVILEGED LINK WITH RECRUITMENT

To support their talent needs, companies can advertise their job offers directly to students and young graduates.

CLOSE TO BUSINESSES

For over 140 years, JUNIA has put its expertise at the service of companies and professionals. As a true bridge between higher education and the economic network, the school offers solutions adapted to the needs for training, innovation, and collaboration.

NEW SKILLS, NEW HORIZONS

In line with a lifelong learning approach, JUNIA offers a wide range of continuing education enabling professionals to:

- Develop new skills
- Validate and certify their achievements
- Prepare for an engineering degree, if applicable

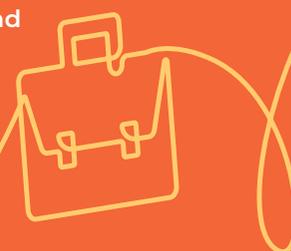

THE CAREER CENTER, THE LINK BETWEEN COMPANIES AND STUDENTS

The Career Center's mission is to support students towards employment and throughout their professional careers. Its role is to help them build their career path, in their search for internships or apprenticeships, and also to facilitate meetings and connections with companies.

The Career Center offers all students a comprehensive path from defining their professional path to their entry into their first job. Additional courses and workshops are set up for international students to give them the codes for French company recruitment. Every student thus benefits from personalized support on each of the three campuses.

The Career Center also means:

- More than 30 student conferences on HR and professional integration topics
- Interview simulations with professional recruiters
- Exclusive meetings with partner companies
- A dedicated platform for internship offers and professional integration

4 CAREER CENTER RECRUITMENT EVENTS

Each year, the Career Center organizes 4 major events dedicated to recruitment:

- **The Companies Forum in autumn:** a multi-campus, in-person event in Lille that brings together over **180 companies**
- **JUNIA International Job Dating in winter:** a multi-campus, 100% remote event with the participation of over **45 companies** offering international opportunities
- **The Apprenticeship Companies Forum in spring:** a multi-campus, **100% remote event** with the participation of over **180 companies** to allow students to find their work-study contract
- **Apprenticeship Fair on the Bordeaux campus** in April: with the participation of over 30 companies

ACADEMIC PROGRAMMES LINKED TO COMPANIES

WHEN STUDENT LIFE MEANS PASSION & ACTION

Student and associative life allows JUNIA students to open up to others, share their passions, discover new ones, develop complementary skills, and flourish.

MORE THAN JUST ASSOCIATIVE LIFE, A COLLECTIVE EXPERIENCE

During their studies, students can get involved in an association and take part in the life of the school in general. There are over **100 associations** distributed across the 3 campuses. By getting involved in the associative and student life of their campus, students have the opportunity to develop new skills, take on responsibilities, and gain autonomy. These are assets they can capitalize on throughout their professional lives.

Involvement in campus associative life is taken into account in the academic evaluation. This evaluation considers the regularity and seriousness of their project throughout the year.

THE STUDENT UNION (BDE) AND ASSOCIATIONS

At JUNIA, associative life plays a central role in the daily lives of students. Coordinated by the Bureau des Élèves (BDE - Student Union) on each campus, it offers everyone the possibility to fully engage in the school's dynamic. Students can join an existing association or choose to create a new one according to their wishes and interests.

Associative activities cover a wide range of fields: artistic (visual arts, theater, music, photo, video, cooking...), solidarity and humanitarian (social actions, international missions, tutoring...), but also event planning, student

services (organizing parties and trips, welcoming newcomers, animating student life), as well as projects related to business and technologies. Throughout the year, these initiatives help create a friendly, dynamic, and enriching environment for the entire student community.

Students are supported by JUNIA teams to carry out their associative projects, a true enrichment of their educational path.

SPORTS ASSOCIATION

The JUNIA Sports Association coordinates the school's sports activities on all 3 campuses. It offers **40 sports with regular practice**, ranging from recreational sports to competition: team sports (football, volleyball, basketball, rugby, handball, hockey, futsal, American football...) or individual sports (tennis, horse riding, archery, badminton, track and field, climbing, golf, karting...), dance (classical, modern, rock, cheerleading), water sports (sailing, swimming, kite-surfing, rowing, water polo...), and combat sports (fencing, judo, kickboxing...).

Furthermore, it organizes a dozen annual events (cross-country race, show jumping, raid, surfing, skiing, prestige rock party).

JUNIA Highlights

Several events and activities punctuate student life and the academic year. Among the most famous and popular events are:

- **The Integration Weekend**
- **The Student Gala on the 3 campuses**
- **Elections for the Student Union and the Sports Union**
- **The Associations Forum**
- **The Sports Trophy**
- **The Graduation Ceremony**
- **Ski weekend, summer weekend, etc.**

JUNIA: A CAREER BOOSTER

Because engineering offers a multitude of career paths, JUNIA gives every student the means to find their place, explore opportunities, and reveal their talent to build a solid and inspiring future.

**JOINING JUNIA MEANS
CHOOSING A SCHOOL
THAT SHAPES TOMORROW'S
ENGINEERS**

JUNIA: ENGINEERING CAREERS TAILORED TO EVERY STUDENT

Joining JUNIA means choosing a school that shapes tomorrow's engineers. It's also **an ecosystem that fast-tracks careers through a pedagogy that combines theory and practice.** Students learn by doing. They take part in real-world projects with companies, complete internships or work-stud programmes, participate in international missions, allowing them to test ideas, learn from mistakes, take on challenges, and progressively discover the reality of engineering careers.

DIVERSE CAREERS, MULTIPLE OPPORTUNITIES

With **35,000 alumni** and strong partnerships with companies, JUNIA offers its engineers incredibly rich career opportunities. Generally speaking, graduates find their first job quickly—many even before graduating.

In a world at the crossroads of major

transitions, JUNIA's engineering graduates invent tomorrow's digital technologies, design more sustainable cities, reimagine our food systems, protect the environment, and improve healthcare. Some also choose entrepreneurship, innovation, or research.

Whatever path they choose, all share the same ambition: **putting their**

skills to work for a world in motion.

Because careers are no longer fixed today, JUNIA supports its graduates throughout their professional journey.

Through **JUNIA XP** and continuing education, the school gives them the means to reinvent themselves, evolve, and change throughout their professional lives.

RESEARCH: A DRIVING FORCE FOR EXCELLENCE

JUNIA is one of the leading non-profit engineering schools in France in terms of commitment to scientific research. Its ambition is to support local areas and companies in meeting their innovation needs and thus to contribute to the major transitions transforming our world.

RESEARCH FACILITIES

Within JUNIA, researchers benefit from laboratories and technical platforms to develop their research. JUNIA's main research infrastructures include:

- The Acoustic Testing Tank
- The Microelectronics Design and Characterization Platform
- The LARS'N Acoustics Laboratory
- The Sustainable Chemistry and Health Laboratory
- The Tunneling Microscope
- The Quantum Physics Laboratory
- The Cybersecurity Laboratory
- The Sensory Analysis Laboratory
- The Soil Analysis Laboratory
- The Agriculture and Microbiology Laboratory
- The Robotics Laboratory
- The Innovative Construction Materials Laboratory
- The Textile Laboratory
- The Electric Power Platform

RESEARCH DEDICATED TO MAJOR TRANSITIONS

In research, JUNIA's ambition revolves around the major environmental, agricultural, energy, digital, and industrial transitions, in connection with the UN's Sustainable Development Goals (SDGs).

This approach is rooted in JUNIA's DNA, based on scientific excellence, responsible innovation, and multidisciplinary.

Committed to its local presence and strongly involved in the academic and scientific ecosystem of its three campuses, JUNIA leverages its scientific and technological assets to help companies and communities find concrete solutions to initiate these transitions at their level.

The diversity of scientific fields and academic offer, as well as the quality of its research activities, place JUNIA as a recognized Institute of Science and Technology, dedicated to supporting transitions within companies and territories.

USEFUL AND COMMITTED RESEARCH

AN EXPERT IN THE DESIGN AND PRODUCTION OF DEMONSTRATORS

Over the years, JUNIA has developed proven and recognized expertise in the design and production of demonstrators.

It currently has 4 demonstrators that allow testing innovative and emerging solutions in real-life situations:

■ **“Smartgrid”** and **“Smartmobility”** on the consumption and renewable production of electricity

■ **“Smartfarming”** focusing on the challenges of tomorrow’s sustainable food production

■ **“Factory 4.0”** for additive manufacturing, computer-aided manufacturing, and maintenance in augmented reality

To maximize societal impact and contribute to the acceptability of new technologies, JUNIA mobilizes all its human, scientific, and technical resources. More than ever, research at JUNIA is designed as a driving force for innovation and a lever for transformation, without losing sight of the need to capitalize on research activities to ensure the sustainability of its economic model.

Pierre Mounanga

Executive Director of Research and Innovation

Research is at the heart of JUNIA’s DNA. Tell us more.

Born from the merger of 3 major engineering schools, HEI, ISA, and ISEN, JUNIA immediately established the link between its training programmes and research. We have about a hundred teacher-researchers who divide their time between teaching and research, as well as 6 jointly supervised laboratories, the newest of which, BioPrev, will start its activities in January 2026. In this context, JUNIA has also developed solid and lasting industrial partnerships. Finally, the school is strongly involved in high-societal-impact projects with companies and local authorities.

In a constantly evolving world, what are the development axes for research within JUNIA?

Research at JUNIA covers a wide spectrum of themes, from life science to nanotechnologies, including acoustics, energy, IoT, AI, connected agriculture, reclamation of degraded soils, sustainable buildings and cities, health and well-being engineering, and future food. We address these different subjects through the lens of the major ongoing transitions, and with state-of-the-art equipment. In this approach, we develop demonstrators that are then

deployed in real-life usage conditions. In the field of urban planning, we are working on Smart Cities and future housing, urban mobility, etc.. In the health field, we are continuing the development of our chemical library, which already has over 4,200 molecules and will allow us to work on potential therapeutic candidates.

What are JUNIA’s strengths in research?

First of all, our multidisciplinary approach involves researchers with diverse yet complementary expertise to serve research and innovation. In parallel, JUNIA has also forged strong and lasting partnerships with the business world, which allows us to root our research efforts in the reality of local areas and their needs. This dimension, moreover, echoes our EESPIG status and our commitment to the public interest, particularly at the local level.

A COMMUNITY OF 35,000 GRADUATES!

By choosing JUNIA, students not only join a school with over 140 years of history, but also a network of 35,000 graduates in France and across five continents.

An alumni association founded in 1949

35 000
graduates

+10 %
of graduates abroad

+250
entrepreneurs

+120
entrepreneurs events organized each year
(conferences, workshops, after-work events, company visits, cultural and sports activities..)

A LIFELONG COMMUNITY

From day one at school, students join the **JUNIA ALUMNI** community. Their network membership guarantees they will never be alone throughout their professional lives! **JUNIA ALUMNI** members have access to a range of dedicated services: mentoring, access to the graduate directory, after-work events, conferences, regular networking events, job postings...

It's also a privileged space for exchange, fostering solidarity and sharing. Beyond this, the network's activities contribute to JUNIA's recognition and visibility in the academic and corporate world.

Contact us :
contact@junia-alumni.com

JUNIA ALUMNI: A NETWORK THAT GROWS YEAR AFTER YEAR

Founded in 1949, the **JUNIA ALUMNI community** builds on over 140 years of history. The network brings together graduates and students from JUNIA's HEI, ISEN, ISA, and XP programmes. While the school operates on **three campuses** in Lille, Bordeaux, and Châteauroux, the network continues to grow with the integration of new graduates each year.

JUNIA ALUMNI DAY

Each year, the community gets together for a themed event.

The programme includes conferences, tours, participatory workshops, and a friendly cocktail reception!

It's also an opportunity for alumni to reconnect and meet current students and fellow graduates.

FROM AMBITION TO SUCCESS: JUNIA'S WINNING COMMITMENT

Dedicated to everyone's success, JUNIA offers specific support that takes into account the diversity of its students and their needs.

SUCCESS SUPPORT: PERSONALIZED ASSISTANCE ACCESSIBLE TO ALL STUDENTS

JUNIA supports its students in their studies through personalized assistance at every level.

In preparatory classes particularly, JUNIA offers tutoring to all students to give them the means to succeed in their first years.

The objectives of this programme are to:

- **Improve acquisition of academic knowledge**
- **Develop efficient study methods**
- **Learn from peers**
- **Develop soft skills such as autonomy, leadership, empathy, adaptability, teamwork...**
- **Foster campus integration**

This tutoring programme rests on four pillars: **mutual support** among students, academic reinforcement in certain subjects, **remediation** or catch-up in sciences, and access to the **right tools** to "learn how to learn."

A SCHOOL ACCESSIBLE TO EVERYONE

Labeled **GEIQ Employment & Disability** and in line with its CSR approach, JUNIA pays particular attention to accessibility in the broadest sense. The school offers adaptations and accommodations to special-need students.

These accommodations are applied case by case, in accordance with the referent physician from Lille Catholic University's Disability Support Center, or the relevant professional on our Bordeaux and Chateauroux campuses. They often involve extended time, note-takers, provision of computer, specific support for internship search preparation of job interview or workplace adaptation.

STUDENT SERVICES :

JUNIA offers a dedicated support system to help international students into their whole journey from their first day at JUNIA until they graduate. Our international team provides the following services :

- **accommodation in student residences,**
- **administrative procedures: visa, resident permit, health insurance, etc.,**
- **integration into student life: student unions, sports activities, international parties, etc.,**
- **welcome session: intensive French language and intercultural communication courses, orientation week, and more.**

ONE SCHOOL ON 3 CAMPUSES

Over the past decade, JUNIA has evolved from a logic of one institution with three schools to that of a single institution structured across three campuses. Far more than a geographical expansion, it's also a paradigm shift for JUNIA, which now positions itself as a national player strongly anchored in local territories.

Since 1885, **HEI**, **ISEN** and **ISA** have been located in Lille's Vauban-Esquermes district.

In 2012, JUNIA expanded its geographical footprint with the opening of a campus in Châteauroux. More recently, in February 2020, the school opened in Bordeaux's Francis of Assisi campus.

With campuses in Lille, Châteauroux, and Bordeaux, JUNIA has shifted from being a local player to having a territorialized national dimension. With this new status as a national player, JUNIA is rethinking its actions and interactions with its entire ecosystem, particularly with companies.

Want to visit our campuses?

Come meet us at our events!

Lille: the historic campus and JUNIA headquarters, spread across 3 buildings and the Palais Rameau.

AN COMMITTED SCHOOL, AN ACKNOWLEDGED RESPONSIBILITY

Given its history, values, and DNA, sustainable development and social responsibility are issues at the heart of JUNIA's concerns. To echo the UN's 17 Sustainable Development Goals (SDGs) by 2030 and the Paris Agreements, JUNIA has titled its CSR policy "RéSonance 1.5."

4 PILLARS FOR AN ENGAGED AND DYNAMIC CSR POLICY

1 PILLAR Social / People

Promoting "living better together" with a focus on health, inclusion in all its forms, mental health, and well-being at work.

2 PILLAR Environmental / Planet

Focusing on issues related to mobility, circular economy, water and energy management, carbon footprint, and biodiversity to "reduce our impact together."

3 PILLAR Economic / Prosperity

"Developing together" by valuing impact research and innovation, social and solidarity entrepreneurship, and territorial anchoring.

4 PILLAR Governance

Enabling us to "measure and manage together" by relying on certifications and standards, establishing dialogue with all stakeholders.

Franck Chauvin
JUNIA CSR Manager

JUNIA is strongly committed to CSR and has chosen to call its policy RéSonance 1.5. Tell us more.

This name contains several symbols, including a visual nod to the concept of CSR. It also refers to our professions, particularly the field of resonance on a scientific level. This name also embodies our ambition: to make the SDGs and the Paris Climate Agreements resonate in the daily lives of all our stakeholders: students, teachers, researchers, staff, and economic actors.

How does your commitment translate into action?

JUNIA has adopted an action plan structured around 4 pillars covering 20 areas of action. On the environmental pillar, our ambition is to be exemplary with particular attention to energy performance, biodiversity, waste management, and decarbonization of our models. This also translates into ISO 14001 certification, a relatively rare approach in higher education. On the social pillar, we work on well-being and health with a focus on mental health, inclusion, and disability. On the economic pillar, we focus on the societal impacts of research. We've also developed ODDYSSÉE, a gamified training programme on ecological transition and sustainable development issues for JUNIA and Lille Catholic University students, businesses... Finally, the last pillar relates to governance.

How do you involve students?

From their arrival at JUNIA, all our students are made aware of and trained in CSR issues and best practices. They must pass the TASK certificate, The Assessment of Sustainability Knowledge. They also have the opportunity to contribute through projects such as conducting CSR diagnoses or audits for the school... They can become CSR coordinators within student associations and their class to relay our sustainability actions. This involvement is taken into account in their evaluation and valued in their grades.

JOIN JUNIA IN 2026!
